CareCalc

CareCalc provides you with...

- How many total care hours are needed
- How many staff are required on shift
- Staffing shortfall oversight
- What to ask for in fee reviews
- CQC Staffing Compliance

The Ultimate Care Home Dependency Calculator

CareCalc is Fusion's intelligent care home dependency calculator.

CareCalc is designed to help residential and nursing care providers make safer staffing decisions, evidence compliance, and secure accurate funding.

Resident Needs Evolve - CareCalc Evolves With Them

What Is a Care Home Dependency Calculator?

Smarter Care. Safer Staffing. Stronger Funding Cases.

A care home dependency calculator is a tool that measures each resident's individual care needs to calculate how many hours of support they require per day.

CareCalc takes this a step further - breaking those hours down by skill level, mapping them to your staffing levels, and highlighting any gaps.

As resident needs become more complex, traditional staffing ratios simply aren't enough.

CareCalc transforms how care homes calculate dependency and care hours - delivering precise, real-time insights to help you plan, justify, and deliver safe, high-quality care.

CareCalc is designed to be powerful, fast, and easy to use - taking just 2 minutes per resident per month.

How Care Calc Works

Technology With a Personal Touch

Resident Profiling Made Simple

Quickly assess care needs using dropdowns and sliders across key categories such as:

- ✓ Mobility
- ✓ Medication
- ✓ Nutrition
- ✓ Supervision
- ✓ Contenance

Real-Time Care Hour Calculations

Instantly see how many total care hours each resident requires, and how these translate to actual staffing levels by role or skill.

Home and Company Level Dashboards

View total care hours required vs. actual staffing. Break down data by time of day, unit, resident, or staff role to identify shortfalls.

Track Changes Over Time

CareCalc stores historic dependency data so you can track how resident needs evolve - ideal for inspections, audits, and care reviews.

Why It Matters

Key Benefits

1 | Better Quality Of Care

Deliver the right support, from the right staff, at the right time. Reduce risk. Increase satisfaction.

2 | Regulation and CQC Compliance

Demonstrate how your staffing levels are directly based on resident needs. CareCalc helps you evidence Regulation 18 (staffing) of the Health and Social Care Act.

3 | Stronger Fee Justification

Use CareCalc to show exactly why a resident needs 1:1 care or increased care time - and secure funding accordingly.

Delivering Results

Key Benefits

4 | Save on Agency Spend

Plan rotas around actual need. Avoid last-minute panic. Save thousands in agency fees.

5 | Track Trends Over Time

See how resident needs change over time. Spot patterns, support staff planning, and be ready for changing levels of support.

6 | Multi-Home Oversight

Multi-home organisations can view dependency trends and staffing benchmarks across all services via the Company Dashboard.

Designed By Clinicians

Fast to Deploy. Easy to Use.

Whether you run a single care home or a national group, CareCalc brings clarity, confidence, and control to one of the most critical parts of care management: your people.

Answer CQC's Toughest Questions with Confidence

“Why do you have this number of people working today?”

With CareCalc, you will always have the evidence.

Customisable to your home's setup, but ready to use out-of-the-box

Tells you exactly who you need on duty by role, unit or time of day

2 Minutes per resident per month

Track changes over time and respond dynamically

CareCalc doesn't just suggest staffing ...
It proves why you need the people you do.
